

# Berries, Pecan and Fruit Trees

## **Figs**

All self-pollinate

1. Celeste One of the best for our area. Pink flesh, medium fruit. Closed eye. Very cold hardy.
2. LSU . Medium size, red to dark purple. Closed eye, cold hardy, and bears 3 crops.
3. Texas ever-bearing. Large, dark brown. Early crop in late June with larger figs. Later figs will be smaller, but bear off and all summer.

## **Apple**

1. Dorset. Golden fruited, good for our area. Needs a pollinator.
2. Yellow Delicious. Good pollinator, yellow Late Sept.
3. Anna Reddish fruit.
4. Gala

## **Pear**

1. Orient Needs a pollinator. Resistant to fire blight. One of best pears for Texas, large fruit. Attractive landscape tree.
2. Atlas
3. Moon glow
4. Warren
5. Tennessee

## **Plum**

1. Morris
2. Santa Rosa Red skin, yellow flesh. Self-pollinating.
3. Methley Purple skin, red flesh. Self-pollinating and makes a good pollinator for others.
4. Bruce
