

# Potting Mixes

## **Bark Mulch**

Processed Bark Mulch helps hold moisture, control weeds, prevent erosion, and act as a temperature barrier in both hot and cold conditions to protect the roots of your plants. It can be worked onto the soil to replenish organic content. 13034

## **Black Humus**

Use Landscapers pride 100% organic Black Humus straight from the bag for mulching and top dressing growing areas. Black Humus can be mixed with perlite, vermiculite, sphagnum peat, or other organics to develop a custom-growing blend. 13035

## **Cow-Manure**

Composted cow manure can be used as an additive to soils and mixes to boost microbial action and aid in organic build up for a healthy environment essential to plant growth. 13042

## **Compost Peat**

A 100% organic blend of screened pine bark and active organics, composted to provide an ideal soil for most plants. Compost Peat can be used straight from the bag to give your plants the high organic matter they need for a natural growing environment. 13041

## **Planting Mix**

Landscapers Pride Planting Mix is a balanced mixture of loamy topsoil, composted bark, and biologically active organics. It is ideally suited for most growing areas. Planting Mix can be used alone, or as an ingredient in other growing mediums. It is specially prepared for new planting areas or renovating old growing beds. 13040

## **Landscapers Pride Gold Premium Potting Mix**

Landscapers Pride Gold Premium Potting mix is a humus-rich, 100 % organic potting medium for indoor and outdoor plants. It's blended with the highest quality ingredients, fortified and balanced to reduce compaction while promoting proper drainage and root development. Gold premium is pH balanced and oxygen-rich. 40 lbs 13038 20lbs 13039

## **Potting Soil**

Landscapers Pride all-purpose Potting Soil is a blend of composted bark, sharp sand and blended organics. It is well-balanced growing medium for potting all types of indoor and outdoor plants. Mix Potting Soil with other ingredients such as perlite, vermiculite, or sphagnum peat to formulate your own custom potting medium. 40 lbs 13036 20 lbs 13037

## **Shredded Hardwood Mulch**

An excellent alternative to cypress mulch, Red Shredded Hardwood Mulch is ideal for areas subject to wind or water erosion. Use on flowerbeds, walkways, play areas, running tracks, or as a general ground cover. Not recommended, however, for tilling into the soil. .2 cu ft 13033
